OF ELECTRICAL
ENGINEERS

IEE PROCEEDINGS-A
covering
Physical Science, Measurement and Instrumentation, Management and Education, and Reviews

Vol. 135, 1988

Published by
The IEE, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, United Kingdom

IEE Proceedings Part A

Physical Science · Measurement and Instrumentation · Management and Education · Reviews

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom.
Publishing Department: PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, United Kingdom

Volume 135 1988 UK ISSN 0143–702X

HONORARY EDITORS

Special issues: Prof. D.T. Swift-Hook (*formerly with CERL*)
Education: Dr. B. Bolton (*University of Bath*)
Management: Mr. D.L. Johnston (*formerly with Urwick Orr and Partners*)
General: Dr. G.W. Chantry (*RTP Division, DTI, London*)

Pages in issues of *IEE Proceedings Part A*, 1988

Pages	Issue No.	Date
1–88	1	January
89–124	2	February
125–192	3	March
193–244	4	April
245–324	5	May
325–432	6	July
433–492	7	September
493–540	8	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $3.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–702X/88 $3.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871; telex 261176 IEELDN G, facsimile: 01 240 77 35.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Addresses

Ash, E.A. Inaugural Address: Higher education, industry and Government — new rules for a *ménage à trois* p1
Jefferies, D.G. Address as Chairman of the IEE Mangement & Design Division: Managing a business in the public sector p13

IEE commissioned reviews

McLean, K.J. Electrostatic precipitators p347
Rawson, H. Glass and its history of service p325

Book reviews

An early history of electricity supply — the story of the electric light in Victorian Leeds. J.D. Poulter p362
Biological effects and health implications of radiofrequency radiation. S.M. Michaelson and J.C. Lin p324
Business for engineers. B.C. Twiss p528
Management for engineers. D.L. Johnston p232
Modern aspects of electrochemistry No. 18. R.E. White, J.O.M. Bockris and B.E. Conway (Eds.) p346
What makes a manager? W. Hirsh and S. Bevan p431

ALGORITHMS

Knowledge-based project control employing heuristic optimisation. T.J. Barber and J.T. Boardman p529
Methods for the solution of open-boundary electromagnetic-field problems. C.R.I. Emson p151
Some aspects of two- and three-dimensional transient-eddy-current modelling using finite elements and single-step time-marching algorithms. P.J. Leonard and D. Rodger p159

ARCING

'Local' conditioning of broad-area vacuum-insulated high-voltage electrodes. R.V. Latham and T.J. Fielding p508
Active network for correcting impulse-voltage measurements. X. Liang and G.O. Martens p487
Arcs in boundary layer flow. S. Au and P.R. Smy p69
Statistical analysis of flashover data using a generalised likelihood method. A.J. Davies, A.R. Rowlands, R. Turri and R.T. Waters p79

BIOLOGICAL EFFECTS

Review of physical diagnostic techniques in medicine and biology: technical progress and future requirements. D.F. Jackson p375

BIOMEDICAL APPLICATIONS

Review of physical diagnostic techniques in medicine and biology: technical progress and future requirements. D.F. Jackson p375

BREAKDOWN AND GAS DISCHARGES

A photon-triggered spark gap. N.L. Allen, S. Bower and D.J. Mellor p56
Effect of humidity and gas density on switching impulse breakdown of short airgaps. A.J. Davies, J. Dutton, R. Turri and R.T. Waters p59
Electrostatic precipitators. K.J. McLean p347
'Local' conditioning of broad-area vacuum-insulated high-voltage electrodes. R.V. Latham and T.J. Fielding p508
Statistical analysis of flashover data using a generalised likelihood method. A.J. Davies, A.R. Rowlands, R. Turri and R.T. Waters p79
Surface recombination of ions and cratering by ion impact. K.G. Emeleus and J.R.M. Coulter p76

CALIBRATION

Design of a portable thermocouple calibrator. W.A. Evans and S.L. Rowlands p33
New lightning flash counter and calibration circuit with improved discrimination of cloud and ground discharges. E. O. Oladiran, E. Pisler and S. Israelsson p22

COAXIAL CABLES

Static fringing capacitance of a dielectric loaded coaxial termination. J.D. Mahony p448

COMPUTER APPLICATIONS

Computer package for calculating electric and magnetic fields exploiting dual energy bounds. J.K. Sykulski p145
Design of a portable thermocouple calibrator. W.A. Evans and S.L. Rowlands p33

COMPUTER SIMULATION

Design of a portable thermocouple calibrator. W.A. Evans and S.L. Rowlands p33
Flux penetration and losses in steel plate with nonsinusoidal magnetisation. D. O'Kelly p193
Losses and flux penetration in non-grain-oriented low-loss steel with non-sinusoidal excitation. D. O'Kelly p199

COMPUTER-AIDED DESIGN

A research group's CACSD environment. S. de la Salle, D. Ho and M.J. Grimble p223
Design of integrated optical circuits using finite elements. T.P. Young p135

CONDUCTORS AND CONDUCTIVITY

Electromagnetic shielding in a system of two slabs. S.M. Panas and E.E. Kriezis p451

CONTROL SYSTEMS

A research group's CACSD environment. S. de la Salle, D. Ho and M.J. Grimble p223
Co-ordinate determination and performance analysis for robot manipulators and guided vehicles. M. Dickinson and A.S. Morris p95
Systems theory and systems engineering. L. Finkelstein, F. Land, E.R. Carson and J.H. Westcott p401

CYBERNETICS AND ROBOTICS

Co-ordinate determination and performance analysis for robot manipulators and guided vehicles. M. Dickinson and A.S. Morris p95

DESIGN

A research group's CACSD environment. S. de la Salle, D. Ho and M.J. Grimble p223
Design of a portable thermocouple calibrator. W.A. Evans and S.L. Rowlands p33
Polyhedral dynamics applied to design and project management. B. Bolton p241
Systems theory and systems engineering. L. Finkelstein, F. Land, E.R. Carson and J.H. Westcott p401

DIELECTRIC MATERIALS

Ammeter induced perturbations of Argand diagrams for Debye-like dielectrics. R. Ongaro, A. Pillonnet and P. Desgoutte p41
How the electrical properties of soil affect the surge performance of buried long systems. F. Lattarulo p51
Impulse flashover along the outer surface of a cylindrical dielectric solid with a gas layer inside. M. Ohki and S. Saito p99 e447
Static fringing capacitance of a dielectric loaded coaxial termination. J.D. Mahony p448

DISCHARGES, ELECTRIC

Active network for correcting impulse-voltage measurements. X. Liang and G.O. Martens p487
Arcs in boundary layer flow. S. Au and P.R. Smy p69
'Local' conditioning of broad-area vacuum-insulated high-voltage electrodes. R.V. Latham and T.J. Fielding p508

DISCHARGES, GAS

A photon-triggered spark gap. N.L. Allen, S. Bower and D.J. Mellor p56
Effect of humidity and gas density on switching impulse breakdown of short airgaps. A.J. Davies, J. Dutton, R. Turri and R.T. Waters p59
Impulse flashover along the outer surface of a cylindrical dielectric solid with a gas layer inside. M. Ohki and S. Saito p99 e447
Surface recombination of ions and cratering by ion impact. K.G. Emeleus and J.R.M. Coulter p76

EDDY CURRENTS

Analysis of a perpendicular-type eddy-current speed meter. N. Takehira and A. Tanaka p89
Comparison of different boundary integral formulations when coupled with finite elements in three dimensions. Z. Ren, F. Bouillault, A. Razek and J.C. Verite p501
Electromagnetic shielding in a system of two slabs. S.M. Panas and E.E. Kriezis p451
Error-based derivation of complementary formulations for the eddy-current problem. J. Rikabi, C.F. Bryant and E.M. Freeman p208
Finite element method for 3D eddy current flow in thin conducting sheets. D. Rodger and N. Atkinson p369
Foucault currents in a conducting sphere moving with constant velocity. J. Van Bladel p463
Integral formulation for 3D eddy-current computation using edge elements. R. Albanese and G. Rubinacci p457
Motion of a conducting loop in a magnetic field. J.G. Van Bladel p217
On certain properties of the electric vector potential in eddy-current problems. Part 2. M.R. Krakowski e432
Some aspects of two- and three-dimensional transient-eddy-current modelling using finite elements and single-step time-marching algorithms. P.J. Leonard and D. Rodger p159
Whitney forms: a class of finite elements for three-dimensional computations in electromagnetism. A. Bossavit p493

EDUCATION AND TRAINING

An educational perspective on in-circuit testing. D.A. Beaujean and S.B. Morgan p233
Digital-pulse approach to electromagnetism. C.J. Carpenter p477
Electromagnetism and semantics. Capt. J.C.G. Field p523
Engineering education and the school system. J.F. Gamlin p271
Engineering ideology. K. Strauss p261
Preparation for careers in engineering and science. Sir H. Bondi p227
The engineer in society (Editorial). J.C. Endersby. p245
The role of the IEE in the advancement of technical education in Britain up to 1924. J.O. Marsh p266
Uses and abuses of technology. K.J. O'Connell p286
Workshop teaching: an experiment in engineering education. R.G. Kelly p113

EDUCATIONAL PROJECTS

An educational perspective on in-circuit testing. D.A. Beaujean and S.B. Morgan p233
Electrical drive simulator for teaching purposes. J.R. Smith and A.J. Tait p29
Engineering education and the school system. J.F. Gamlin p271
Preparation for careers in engineering and science. Sir H. Bondi p227

ELECTROMAGNETIC THEORY

Analysis of a perpendicular-type eddy-current speed meter. N. Takehira and A. Tanaka p89
Application of layer theory to transient electromagnetic problems in linear media. M.C. Begg, A.G. Armstrong and J. Toyer p188
Calculation of self and mutual impedances for coils on ferromagnetic cores. D.J. Wilcox, M. Conlon and W.G. Hurley p470
Comparison of different boundary integral formulations when coupled with finite elements in three dimensions. Z. Ren, F. Bouillault, A. Razek and J.C. Verite p501
Complementary solutions of linear and nonlinear magnetostatic problems. J. Rikabi, C.F. Bryant and E.M. Freeman p433
Computation of fields due to current sources. J. Penman, M.D. Grieve and G. Ellis p515
Computer package for calculating electric and magnetic fields exploiting dual energy bounds. J.K. Sykulski p145
Design of integrated optical circuits using finite elements. T.P. Young p135
Digital-pulse approach to electromagnetism. C.J. Carpenter p477
Dual energy methods in electromagnetism using tubes and slices. P. Hammond and D. Baldomir p167
Electromagnetic shielding in a system of two slabs. S.M. Panas and E.E. Kriezis p451
Electromagnetism and semantics. Capt. J.C.G. Field p523
Finite element method for 3D eddy current flow in thin conducting sheets. D. Rodger and N. Atkinson p369
Foucault currents in a conducting sphere moving with constant velocity. J. Van Bladel p463
How the electrical properties of soil affect the surge performance of buried long systems. F. Lattarulo p51

Integral formulation for 3D eddy-current computation using edge elements. R. Albanese and G. Rubinacci p457
Magnetostatic problems in multiply connected regions: some properties of the curl operator. A. Bossavit p179
Methods for the solution of open-boundary electromagnetic-field problems. C.R.I. Emson p151
Motion of a conducting loop in a magnetic field. J.G. Van Bladel p217
On certain properties of the electric vector potential in eddy-current problems. Part 2. M.R. Krakowski e432
Poynting vector probe for measuring power at extremely low power factor. W.Z. Fam p385
Some aspects of two- and three-dimensional transient-eddy-current modelling using finite elements and single-step time-marching algorithms. P.J. Leonard and D. Rodger p159
Symmetry of electromagnetism. S.E. Harris p363
Synthesis of electrodes for axisymmetric systems. C.J. Edgcombe p125
Two-dimensional field computation using boundary integral equations method for stationary and quasistationary problems with external current sources. E. Basso-Ndjock and C. Broche p173
Whitney forms: a class of finite elements for three-dimensional computations in electromagnetism. A. Bossavit p493

ELECTRON DEVICES

Synthesis of electrodes for axisymmetric systems. C.J. Edgcombe p125

ELECTRONIC WARFARE

Implications of military engineering. T.D.N. Williams p303
The effect of the defence sector on the UK electronics industry. P.E. Trier, P. Gummett, J. Richards and A. Wallard p419

ENERGY CONVERSION AND STORAGE

Entropy: Murphy was right. G. Weissmann p123

The engineer in society. D. Lidgate p247
The enigma of the engineer. Hero of the industrial revolution: mere henchman in an age of science. O.H. Critchley p253
The role of the IEE in the advancement of technical education in Britain up to 1924. J.O. Marsh p266
Third World electrification. H.W. Whittington p277
Uses and abuses of technology. K.J. O'Connell p286

ENGINEERING AND SOCIETY

Engineering education and the school system. J.F. Gamlin p271
Engineering ideology. K. Strauss p261
Entropy: Murphy was right. G. Weissmann p123
Implications of military engineering. T.D.N. Williams p303
Perception, reality and values: science, conditioning and evidence. A.J. Ellison p319
Preparation for careers in engineering and science. Sir H. Bondi p227
Social benefits of electricity. B. Bowers p291
Technology and engineering design: shaping a better future or repeating the mistakes of the past?. P.T. Kidd p297
Technology and the human factor. D.A. Bell p309
The engineer in society (Editorial). J.C. Endersby. p245
The engineer in society. D. Lidgate p247
The enigma of the engineer. Hero of the industrial revolution: mere henchman in an age of science. O.H. Critchley p253
The role of the IEE in the advancement of technical education in Britain up to 1924. J.O. Marsh p266
Third World electrification. H.W. Whittington p277
Unemployment: technological causes, cures and consequences. C.F. George p313
Uses and abuses of technology. K.J. O'Connell p286

FERROMAGNETICS

Calculation of self and mutual impedances for coils on ferromagnetic cores. D.J. Wilcox, M. Conlon and W.G. Hurley p470

FINANCIAL MANAGEMENT

Higher education, industry and Government — new rules for a *ménage à trois*. E.A. Ash p1

HISTORY

History of the electrical units and early standards. A.C. Lynch d88
Social benefits of electricity. B. Bowers p291
The St. Andrews 1863 British Association Ohm. J.F. Allen and E.M. Wray p88
The enigma of the engineer. Hero of the industrial revolution: mere henchman in an age of science. O.H. Critchley p253
The role of the IEE in the advancement of technical education in Britain up to 1924. J.O. Marsh p266

INSTRUMENTATION AND MEASURING SCIENCE

Active network for correcting impulse-voltage measurements. X. Liang and G.O. Martens p487
Electrical drive simulator for teaching purposes. J.R. Smith and A.J. Tait p29
New lightning flash counter and calibration circuit with improved discrimination of cloud and ground discharges. E. O. Oladiran, E. Pisler and S. Israelsson p22

INSULATORS AND INSULATION

Impulse flashover along the outer surface of a cylindrical dielectric solid with a gas layer inside. M. Ohki and S. Saito p99 e447

INTEGRATED OPTICS

Design of integrated optical circuits using finite elements. T.P. Young p135

IONISATION

A photon-triggered spark gap. N.L. Allen, S. Bower and D.J. Mellor p56
Electrostatic precipitators. K.J. McLean p347
'Local' conditioning of broad-area vacuum-insulated high-voltage electrodes. R.V. Latham and T.J. Fielding p508
Surface recombination of ions and cratering by ion impact. K.G. Emeleus and J.R.M. Coulter p76

LIGHTING

Glass and its history of service. H. Rawson p325

LIGHTNING AND LIGHTNING PROTECTION

New lightning flash counter and calibration circuit with improved discrimination of cloud and ground discharges. E. O. Oladiran, E. Pisler and S. Israelsson p22

LOAD AND VOLTAGE REGULATION

Poynting vector probe for measuring power at extremely low power factor. W.Z. Fam p385

MAGNETIC DEVICES AND PROPERTIES

Magnetostatic problems in multiply connected regions: some properties of the curl operator. A. Bossavit p179

MAGNETIC FIELDS

Application of layer theory to transient electromagnetic problems in linear media. M.C. Begg, A.G. Armstrong and J. Toyer p188
Complementary solutions of linear and nonlinear magnetostatic problems. J. Rikabi, C.F. Bryant and E.M. Freeman p433
Computation of fields due to current sources. J. Penman, M.D. Grieve and G. Ellis p515
Computer package for calculating electric and magnetic fields exploiting dual energy bounds. J.K. Sykulski p145
Digital-pulse approach to electromagnetism. C.J. Carpenter p477
Dual energy methods in electromagnetism using tubes and slices. P. Hammond and D. Baldomir p167
Finite element method for 3D eddy current flow in thin conducting sheets. D. Rodger and N. Atkinson p369
Flux penetration and losses in steel plate with nonsinusoidal magnetisation. D. O'Kelly p193
Losses and flux penetration in non-grain-oriented low-loss steel with non-sinusoidal excitation. D. O'Kelly p199
Magnetostatic problems in multiply connected regions: some properties of the curl operator. A. Bossavit p179
Methods for the solution of open-boundary electromagnetic-field problems. C.R.I. Emson p151
Motion of a conducting loop in a magnetic field. J.G. Van Bladel p217
Symmetry of electromagnetism. S.E. Harris p363
Two-dimensional field computation using boundary integral equations method for stationary and quasistationary problems with external current sources. E. Basso-Ndjock and C. Broche p173

MANAGEMENT

Engineers and management. H. Beck p390
Managing a business in the public sector. D.G. Jefferies p13
Research co-operatives: experiences with a small-scale approach. D.P. Burton and T. Coffey p539
Successful management simulation for young engineers. N.J. Burton and P.M. Weitzel p110
Systems creativity. D.K. Hitchins p407
Systems theory and systems engineering. L. Finkelstein, F. Land, E.R. Carson and J.H. Westcott p401
The effect of the defence sector on the UK electronics industry. P.E. Trier, P. Gummett, J. Richards and A. Wallard p419

MATHEMATICAL TECHNIQUES

Ammeter induced perturbations of Argand diagrams for Debye-like dielectrics. R. Ongaro, A. Pillonnet and P. Desgoutte p41
Application of layer theory to transient electromagnetic problems in linear media. M.C. Begg, A.G. Armstrong and J. Toyer p188
Comparison of different boundary integral formulations when coupled with finite elements in three dimensions. Z. Ren, F. Bouillault, A. Razek and J.C. Verite p501
Complementary solutions of linear and nonlinear magnetostatic problems. J. Rikabi, C.F. Bryant and E.M. Freeman p433
Computation of fields due to current sources. J. Penman, M.D. Grieve and G. Ellis p515
Computer package for calculating electric and magnetic fields exploiting dual energy bounds. J.K. Sykulski p145
Digital-pulse approach to electromagnetism. C.J. Carpenter p477
Dual energy methods in electromagnetism using tubes and slices. P. Hammond and D. Baldomir p167
Electromagnetic shielding in a system of two slabs. S.M. Panas and E.E. Kriezis p451

Integral formulation for 3D eddy-current computation using edge elements. R. Albanese and G. Rubinacci p457
Knowledge-based project control employing heuristic optimisation. T.J. Barber and J.T. Boardman p529
Magnetostatic problems in multiply connected regions: some properties of the curl operator. A. Bossavit p179
Methods for the solution of open-boundary electromagnetic-field problems. C.R.I. Emson p151
Some aspects of two- and three-dimensional transient-eddy-current modelling using finite elements and single-step time-marching algorithms. P.J. Leonard and D. Rodger p159
Symmetry of electromagnetism. S.E. Harris p363
Synthesis of electrodes for axisymmetric systems. C.J. Edgcombe p125
Two-dimensional field computation using boundary integral equations method for stationary and quasistationary problems with external current sources. E. Basso-Ndjock and C. Broche p173
Whitney forms: a class of finite elements for three-dimensional computations in electromagnetism. A. Bossavit p493

MEASUREMENT AND MEASURING

Active network for correcting impulse-voltage measurements. X. Liang and G.O. Martens p487
Arcs in boundary layer flow. S. Au and P.R. Smy p69
Electrical drive simulator for teaching purposes. J.R. Smith and A.J. Tait p29
New lightning flash counter and calibration circuit with improved discrimination of cloud and ground discharges. E. O. Oladiran, E. Pisler and S. Israelsson p22

MICROPROCESSORS

Simple real-time signal processing laboratory experiment. S.A. Todd and A.T. Sapeluk p107

MODELLING

Static fringing capacitance of a dielectric loaded coaxial termination. J.D. Mahony p448

NUMERICAL ANALYSIS

Integral formulation for 3D eddy-current computation using edge elements. R. Albanese and G. Rubinacci p457

OPTICAL FIBRES

Glass and its history of service. H. Rawson p325

OPTICAL WAVEGUIDES

Design of integrated optical circuits using finite elements. T.P. Young p135

OPTIMISATION

Knowledge-based project control employing heuristic optimisation. T.J. Barber and J.T. Boardman p529

PERMITTIVITY

Static fringing capacitance of a dielectric loaded coaxial termination. J.D. Mahony p448

PERTURBATION THEORY

Ammeter induced perturbations of Argand diagrams for Debye-like dielectrics. R. Ongaro, A. Pillonnet and P. Desgoutte p41

PHYSICAL PROPERTIES

How the electrical properties of soil affect the surge performance of buried long systems. F. Lattarulo p51

PLASMAS

Surface recombination of ions and cratering by ion impact. K.G. Emeleus and J.R.M. Coulter p76

POWER ELECTRONICS

Finite element method for 3D eddy current flow in thin conducting sheets. D. Rodger and N. Atkinson p369

POWER SYSTEMS AND PLANT

Poynting vector probe for measuring power at extremely low power factor. W.Z. Fam p385

POWER TRANSMISSION AND DISTRIBUTION

Managing a business in the public sector. D.G. Jefferies p13

PRODUCTION ENGINEERING

The effect of the defence sector on the UK electronics industry. P.E. Trier, P. Gummett, J. Richards and A. Wallard p419

PROJECT AND PRODUCTION ENGINEERING

Implications of military engineering. T.D.N. Williams p303
Knowledge-based project control employing heuristic optimisation. T.J. Barber and J.T. Boardman p529
Polyhedral dynamics applied to design and project management. B. Bolton p241
Systems creativity. D.K. Hitchins p407
Technology and engineering design: shaping a better future or repeating the mistakes of the past?. P.T. Kidd p297

PROJECT MANAGEMENT

Knowledge-based project control employing heuristic optimisation. T.J. Barber and J.T. Boardman p529
Research co-operatives: experiences with a small-scale approach. D.P. Burton and T. Coffey p539

REVIEWS OF PROGRESS

Social benefits of electricity. B. Bowers p291

ROBOTICS

Co-ordinate determination and performance analysis for robot manipulators and guided vehicles. M. Dickinson and A.S. Morris p95

SIGNAL PROCESSING

Simple real-time signal processing laboratory experiment. S.A. Todd and A.T. Sapeluk p107

SIMULATION

Electrical drive simulator for teaching purposes. J.R. Smith and A.J. Tait p29

SOCIAL RESPONSIBILITY

Engineering ideology. K. Strauss p261

STANDARDISATION AND STANDARDS

History of the electrical units and early standards. A.C. Lynch d88
The St. Andrews 1863 British Association Ohm. J.F. Allen and E.M. Wray p88

TRANSFORMERS

Poynting vector probe for measuring power at extremely low power factor. W.Z. Fam p385

UNDERGROUND CABLES

How the electrical properties of soil affect the surge performance of buried long systems. F. Lattarulo p51
